- Integrated **Firebase Authentication**, real-time notifications, and cross-device data synchronization to improve user experience and application reliability.
- Developed modular Flutter UI components, collaborated in an **Agile** environment with cross-functional teams, and managed version control using **Git/GitHub**.

Centre for Social Entrepreneurship and Development, VIT

Apr 2024 – Feb 2025

Core Committee Member

Vellore, Tamil Nadu

- Organized and managed **workshops and tech events for 200+ students** focused on social entrepreneurship.
- Collaborated with **cross-functional teams** to design initiatives integrating technology and community development.

Projects

RecruitIQ – AI-Powered Resume Screening System | Python, Streamlit, LangChain, FAISS, Scikit-learn— GitHub

- Engineered an AI resume screening pipeline processing **100+ resumes per batch** using OCR, **LLM-powered parsing**, Sentence Transformer embeddings, and Information Retrieval.
- Architected a scalable **50+ feature LightGBM ranking pipeline** leveraging semantic search, feature engineering, optimization, and multi-factor ranking, and built a recruiter dashboard with **8+ AI-powered features**, including smart shortlisting, explainable AI, **skill-gap analysis**, and automated outreach.
- Deployed the application on **Streamlit Cloud** using GitHub-based CI/CD for automated deployment, version control, and continuous delivery ([Live Demo](#)).

ArchHive – Collaborative Architecture Platform | ReactJS, Firebase, Supabase, Tailwind CSS— GitHub

- Built a full-stack collaborative platform for architecture students to discover, organize, publish, and bookmark architectural case studies.
- Architected scalable search, filtering, and **ArchHive Studio**, a structured content authoring workflow for creating, managing, and publishing architectural repositories across **5+ architectural typologies**, improving content discovery and user experience through **unit testing**.
- Implemented secure user authentication, session management, and account lifecycle features using Firebase Authentication and Supabase with **transactional deletion safeguards**.

EcoMind – AI-Powered Waste Classification App | Flutter, Firebase, TensorFlow Lite— GitHub

- Developed an AI-powered waste classification application by fine-tuning and deploying a **MobileNetV2 (TensorFlow Lite)** model achieving **92.4% accuracy** across **13+ waste categories**.
- Optimized and evaluated the model on **15,000+ waste images**, achieving **145ms latency** for on-device inference while integrating **5+ AI-powered modules** for waste scanning, analytics, chatbot assistance, and sustainability.
- Built during the **Yantra Central Hackathon**, collaborating with a multidisciplinary team and advancing to the **final round**.
